Teresa – thanks...you don't need to have Drs. Stayner and Loomis register for the pre-SACC...I will let the organizers know they will be joining us so they can speak and they will get a different call-in number.

Hi Gino,

Leslie Stayner and Dana Loomis will be able to attend the pre-SACC meeting and SACC meeting. Dr. Stayner's availability will be more limited later in the day, since Denmark is 6 hours ahead of us. If you are able to provide a detailed schedule once it becomes available, and the times that are most critical for attendance, then I think that will help them to focus on being present and fully alert during those particular times (perhaps requiring a couple cups of coffee if it's late at night in Denmark).

Leslie Elliott is unlikely to be able to attend the pre-SACC meeting and she does not know yet whether she will be able to make the SACC meeting. She is driving across country and will need to wait and see how that goes.

I have requested that Leslie S and Dana go ahead and register for the pre-SACC meeting.

Please let me know if you need anything else right now.

Thanks,
Teresa

Teresa:

Thanks for your questions....I will talk with the DFO to see what I can find out; but I am guessing that the topic involving the subs (development of the IUR) will take up perhaps two of the four days allotted. We should be able to narrow it down...

Do you have any additional information about the schedule? I looked in the docket, and found that the SACC meeting will be from ~10 am – 5 pm. Should the consultants plan to be there for the entire time? If they cannot attend for the entire meeting, are there certain parts of the meeting that will be more important for them to attend? (You may not be able to answer this without the finalized schedule.)

For example, Leslie Stayner will be calling in from Denmark, so there will be a time difference. This may make it difficult for him to attend during the later hours of the day.

Hi Nikki and Gino,

I have passed this along to the consultants, and I will let you know their availability.

Thanks,
Teresa

Hi Teresa,

Please see the TD below. Thank you!

As you may know, the draft Asbestos Risk Evaluation and associated documents were publicly posted on Monday, March 30th - and all the documents are posted here.

Attached are both the charge questions to the peer review committee and the draft risk evaluation (a pdf version with links to all sources; as subcontractors you have access to this internal version and we ask that you not circulate this or any of the references due to copyright restrictions).

Per our communication with you on 2/27/20, as part of your continuing support of the asbestos risk evaluation, the subcontractors (Drs. Loomis, Elliot and Stayner) are expected to be available for the following tasks (the first one has been replaced as their expertise was not needed to address inter-/intra-agency comments and the second one has a new addition):

- i. At least one of you (preferably all) be available for a short pre-SACC meeting on the charge questions (scheduled for April 7th from 1-4 pm EDT; here is the link to follow to register for this short pre-meeting). Expected level of effort (4 hours per person).
- ii. At least one of you (preferably all) be available for the SACC peer review (scheduled for April 27-30 as a virtual meeting due to the Covid-19 situation). Expected level of effort (30 hours per person).
 - a. Possible review of public comments received prior to the April 27th SACC. If it occurs, expected added level of effort could be up to 4-6 hours per person.
- iii. Respond to SACC and public comments after the public comment period/SACC report is published. Expected level of effort – 40 hour/person in the June-August timeframe.
